

ECCO® CREAMS

Beauty that makes dreams come true!

NATURAL PRODUCT is a modern cosmetic company located among the picturesque landscapes of Tvardita town, in the south of the Republic of Moldova.

The French cosmetics laboratory TESSANIER, together with NATURAL PRODUCT Company, decided to start the production of natural French cosmetic products for supplies to Eastern Europe on the basis of the production facilities of NATURAL PRODUCT Company.

The objective of the joint French-Moldovan holding is producing French cosmetics for the Eastern European market at affordable prices, as well as facilitating the access of Eastern European partners to high-quality French cosmetic products. Thus, the company NATURAL PRODUCT is the representative of the French cosmetic laboratory in Moldova.

The best European scientists in the field of cosmetology were involved to develop the formula. Within the walls of the leading European beauty laboratory of the company **COSMETIC INNOVATION, unique molecules were developed that have no analogues in the world** as active ingredients for these products. Revolutionary formulas for original creams were also developed there.

Cosmetics based on innovative methods, modern technologies and natural ingredients at an affordable price – this is the main credo of the Company.

The best European designers, mainly from renowned Swiss design studios, were involved in the development of all the brilliant and bold design solutions of the Company.

Creation of NATURAL PRODUCT cosmetics is a science-intensive and high-technology process. The unique equipment enables creating the finest emulsions that penetrate the skin, achieving maximum effect.

The production facilities are provided with the most modern Italian equipment, which enables using innovative technologies.

Natural raw materials are purchased from the best manufacturers in France, Spain and Germany under a multi-level quality control system.

Every month, the products of NATURAL PRODUCT are sent to the European laboratory for the necessary analyzes and quality control.

NATURAL PRODUCT cosmetics support and stimulate the natural functions of the skin without disturbing or replacing them, performing biomimetic properties.

Natural Product cosmetics are certified in accordance with European quality standards and were notified on the central electronic interface - CPNP (Cosmetic Products Notification Portal).

Natural Product Company, together with European scientists, guarantees the lack of allergic components, carcinogens and parabens in its products. The entire line of creams, for both face and hands, all the products of the Company are absolutely safe and hypoallergenic, and are recommended by the professor, toxicologist, doctor of medical sciences Karolina Lyubomirova to persons with various skin problems.

ECCO® creams are a unique French perfume composition that combines natural raw materials and a delicate cosmetic bouquet.

MOISTURIZING FACE CREAM ECCO® WITH LIPOMOIST™

The moisturizing face cream ECCO® with Lipomoist™ is a professional and effective remedy for dry and sensitive skin prone to flaking.

Action of Lipomoist™:

- Increases collagen levels by 20% during 10 days.
- Significantly stimulates the formation of cellular proteins based on keratinocytes, their total amount increases three times.
- Instantly softens irritated, dry or rough skin.

The moisturizing face cream ECCO with Lipomoist™ increases the level of collagen in the skin, rejuvenates, enhances elasticity, maintains the desired level of skin hydration, thereby improving its elasticity.

Lipomoist™ forms a moisturizing protective molecular film on the skin, stimulates the formation of plant cellular proteins and amino acids.

The unique composition based on natural ingredients allows moisturizing the skin as much as possible without clogging pores and prevents all kinds of allergic manifestations and redness. At the same time, the skin breathes freely and feels fresh. The general structure of the mixture is airy, pleasant to the touch and has a light aroma.

The **moisturizing face cream ECCO® with Lipomoist™**:

- ✓ great for chin, neck, décolleté and hands;
- ✓ has a tightening effect;
- ✓ smoothes wrinkles;
- ✓ evens out the skin;
- ✓ has a moisturizing effect;
- ✓ increases skin elasticity.

The cream is applied to the skin with light movements in a thin layer. The skin is covered with an invisible membrane film, forming a single layer of molecules and minimizing water loss. After application, a refreshing effect is felt.

It is suitable for all skin types, even irritated skin, does not cause an allergic reaction and free of carcinogens.

NOURISHING FACE CREAM ECCO® WITH HYALURONIC ACID

The nourishing face cream ECCO® with hyaluronic acid provides the skin with the right balance of nutrients and trace elements. The cream contains a mixture of hyaluronic acid and shea butter.

Hyaluronic acid is a natural beauty molecule found in the skin

Hyaluronic acid is able to attract and retain (bind) water, thereby providing elasticity and strengthening the skin frame. Turgor, even skin relief, clear face contour – all this can be achieved with the hyaluronic acid. Getting on the skin surface, it forms a film that prevents moisture evaporation and at the same time protects against aggressive environmental factors.

Shea butter contains polyunsaturated fatty acids. The substances present in the composition of the oil have regenerating properties that allow activating the production of collagen, and fatty acids contribute to deep nourishment of the skin and make it more elastic and prevent premature aging.

Due to the high content of valuable components in the cream, the regenerating properties are activated at the cellular level, which prevents age-related changes.

The cream with hyaluronic acid has a delicate enveloping texture that is quickly absorbed without leaving a sticky film. It is suitable for all skin types, is used as a day and evening care. As a result of application, the lipid barrier of the skin is deeply restored and the oval of the face looks more toned and clearer. The skin is refreshed, wrinkles are smoothed out, dullness disappears.

The **nourishing face cream ECCO® with Hyaluronic Acid:**

- ✓ contains hyaluronic acid and shea butter;
- ✓ is used as day and night care;
- ✓ keeps the face fresh;
- ✓ maintains the required level of nutritional value of the face;
- ✓ smoothes wrinkles;
- ✓ protects the skin from harmful external influences;
- ✓ stimulates the appearance of new cells;
- ✓ has anti-aging effects.

ANTI-AGING FACE CREAM ECCO[®] WITH VINIDERM[®]

Viniderm[®] is a grape juice extract rich in polyphenols, including a rare polyphenol: δ -viniferine. Viniderm[®] has a prophylactic anti-aging effect by protecting the main components of the skin and helps to regenerate stem cells.

The cream is based on grape oil obtained from the processing of Vitis Lambrusca grape seed.

As you know, the vine is an inexhaustible source of rich elements. It contains a high concentration of OMEGA-6 and vitamin E, which help the skin to improve its regenerating properties. The components of the cream are able to penetrate deeply into the skin, preventing dehydration, heal painful cracks, soothe, provide absolute softness and smoothness to the epidermis.

The anti-aging face cream ECCO[®] with Viniderm[®] is able to instantly provide the very dry and sensitive skin with intensive nutrition, saturating it with healthy grape seed oils.

The anti-aging face cream ECCO[®] with Viniderm[®] is an effective anti-aging remedy from the first to deep wrinkles.

The anti-aging face cream ECCO[®] with Viniderm[®]:

- ✓ contains Vitis Lambrusca grape juice extract;
- ✓ its effectiveness is visible after 2-3 weeks of use;
- ✓ is used as day and night care;
- ✓ nourishes, moisturizes and softens irritated, dry skin;
- ✓ antioxidant face lifting;
- ✓ reduces the depth of wrinkles;
- ✓ evens out skin tone and micro-relief;
- ✓ restores firmness and elasticity of the skin.

NOURISHING HAND AND NAIL CREAM ECCO® WITH SHEA BUTTER AND VITAMIN E

The nourishing hand and nail cream ECCO® with Shea butter actively softens and moisturizes the skin, smoothes small wrinkles, improves skin colour, fills cells with vitamins and fatty acids.

The special formula of the cream has been developed for the complex care of the skin of hands and nails. The cream provides the skin with the necessary nutrition and hydration.

The cream contains a high concentration of Shea butter, which is known for its healing properties. It enriches the skin with fatty acids, accelerates the healing of damages, relieves inflammation and irritation. Shea butter activates metabolism, stimulates microcirculation, smoothes the skin and removes wrinkles. It also helps protect the epidermis from external influences and disease-causing factors.

The nourishing hand and nail cream ECCO® should always be carried in your purse, regardless of the season. It moisturizes, nourishes and prevents the skin from drying out. The cream spreads easily, leaving a velvety feeling in a couple of seconds. The nourishing cream recovers and heals the skin, eliminates irritation.

The nourishing hand and nail cream ECCO® with Shea butter and vitamin E:

- ✓ is hypoallergenic;
- ✓ nourishes and moisturizes the skin;
- ✓ has a delicate and fresh aroma;
- ✓ improves skin colour;
- ✓ fills cells with vitamins and fatty acids;
- ✓ provides an economical consumption.

MOISTURIZING HAND AND NAIL CREAM ECCO® WITH HYALURONIC ACID

The moisturizing hand and nail cream ECCO® with hyaluronic acid is designed to deeply moisturize and nourish the skin. It contains vitamin E, glycerin and hyaluronic acid. Such a composition of the cream allows the product to instantly relieve the skin of tightness and irritation, restore the natural protective functions of tissues, and protect hands from the destructive effects of ultraviolet rays.

Hyaluronic acid is a substance of natural origin and is vital for the body. It acts like a magnet for moisture, helping to effectively retain moisture and create an optimal internal environment for comfortable cell functioning. Hyaluronic acid as a 'cement' that binds cells together, regulates their metabolism, supports collagen synthesis, moisturizes the skin, ensures its elasticity and healthy shine.

The texture of the hand and nail cream with hyaluronic acid is silky. It immediately softens and moisturizes the skin. It is perfectly absorbed, and makes your hands velvety. It is especially suitable for thin, dry, flaky skin of hands.

The moisturizing hand and nail cream ECCO® with hyaluronic acid:

- ✓ is hypoallergenic;
- ✓ prevents the appearance of wrinkles;
- ✓ moisturizes, smoothes, protects the skin;
- ✓ prevents the appearance of wrinkles
- ✓ does not contain toxic and harmful substances;
- ✓ provides an economical consumption.

REVITALIZING CREAM ECCO® WITH D-PANTENOL, NIACINAMIDE AND VITAMIN E. WITHOUT ALLERGENS

The revitalizing cream ECCO® with vitamin E, D-panthenol and niacinamide has been specially created for the thorough care of sensitive hand skin.

The main action of D-panthenol is to help regenerate tissues. It also has the following positive effects:

- relieves inflammation in the area of damage of the integrity of the skin;
- reduces irritation, including after cosmetic procedures;
- restores and moisturizes the skin, fights against flaking;
- helps wounds to heal faster;
- promotes faster renewal of the skin;
- relieves abrasions and redness.

Niacinamide or nicotinic acid is a water-soluble vitamin B3. This vitamin has a wide range of effects on the skin, as it:

- restores the barrier function of the dermis, levelling peeling, irritation and dehydration;
- improves skin colour, removes dullness;
- reduces redness, relieves inflammation;
- brightens pigmented spots;
- slows down the aging process (antioxidant);
- increases the elasticity of the skin;
- narrows the pores;
- keeps the skin matte.

It perfectly fights against dryness, flaking, dehydration, chapping of the skin of hands. The regenerating cream has a wide range of action on the skin of hands: it restores the barrier function of the dermis, levelling peeling, irritation and dehydration; it improves skin colour; removes dryness; relieves inflammation; slows down the aging process; increases the elasticity of the skin. The formula of the cream allows effectively caring for the skin of hands, and for the most demanding and sensitive one. The regenerating hand and nail cream is an excellent helper for the care of damaged skin of hands.

The texture of the cream is light and delicate. It spreads well on the skin and is quickly absorbed, perfectly softens and makes hands soft.
